

WHAT WILL MY CHILD AND I LEARN DURING OUR KUMON FREE TRIAL?

1. Your child will learn how small amounts of daily study will work for them and they'll feel the satisfaction of completing their worksheets.
2. They will get to experience the atmosphere of our study centre/online classes where students are focused on their own individually set worksheets under our team's guidance.
3. Your child will learn how to complete their worksheets in a timely way, demonstrating and practising what they already know, as they prepare for more advanced work.
4. They will learn how it feels to be working at a steady pace when you are focused on what you are doing.
5. The Free Trial gives your child the opportunity to demonstrate what they already know and what they are capable of achieving, because the work is set at a level that is comfortable.
6. **You will learn** how your child settles into a daily study routine and how it can work for your family, plus you'll learn more about your child by seeing them complete the worksheets by themselves.
7. **Your Kumon Instructor will learn** about the potential in your child. Whether that is their ability to focus, attention to detail, mental calculation skills, reading comprehension or pencil control skills, your Instructor will be able to identify areas in which Kumon can really start to develop your child.

The Free Trial is much like a one-day gym pass; no one expects to get fit in just one day! Within one week, you and your child will get a sense of how Kumon can be the start of a self-learning transformation.

For early learners and those starting primary school in the coming year, joining Kumon gives them the opportunity to become a little braver, and for them to learn how to sit for short periods of time focusing on one activity. At Kumon they will work on their pencil control skills and you'll get to see what they can achieve when they are working with an Instructor and away from your side.
